The colouring and oiling of which, helps preserve and enhance the beauty and nature of the grain.

On closer inspection the outstanding quality of each piece can be seen and is emphasized by the slightly irregularly rounded off corners – an effect expressly desired to highlight its uniqueness.

The infinite “open end” combination possibilities of our building sets, together with their bright colours and sparkling elements, help to promote and encourage a child’s spontaneity, improvisation and creative versatility.

We want to appeal to both aesthetically and technically oriented children, who can thus inspire each other and create wonderful play worlds together.
